

Origami Five-Petal Flower

Written By: Julie Hudy

TOOLS:

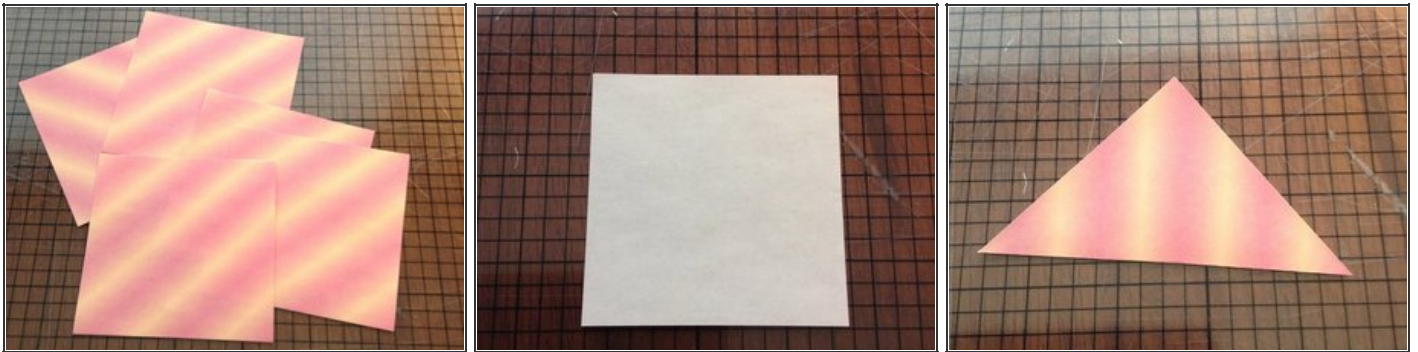

- [Hot Glue gun & hot glue \(1\)](#)
- [Origami Paper \(5 sheets\)](#)
- [Pipe Cleaners - optional \(1\)](#)

Step 1 — Origami Five-Petal Flower

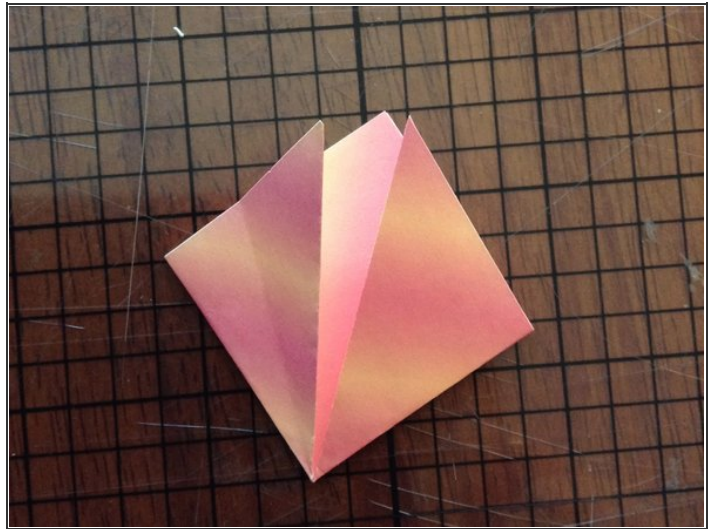

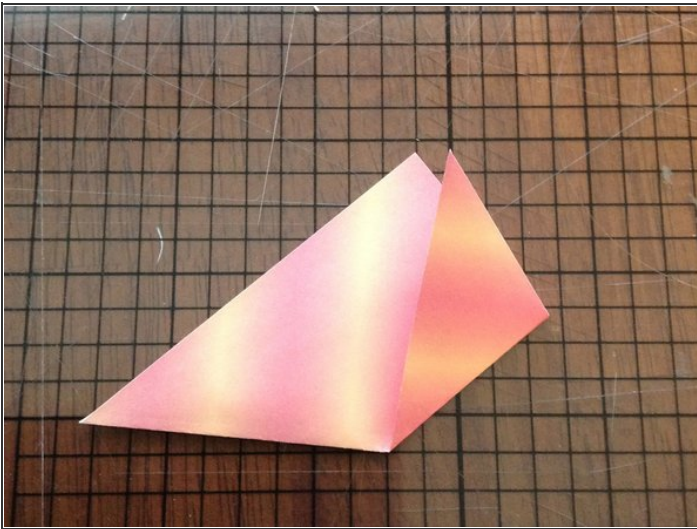

- The 3 pictures show variations of what you can do with these directions.

Step 2

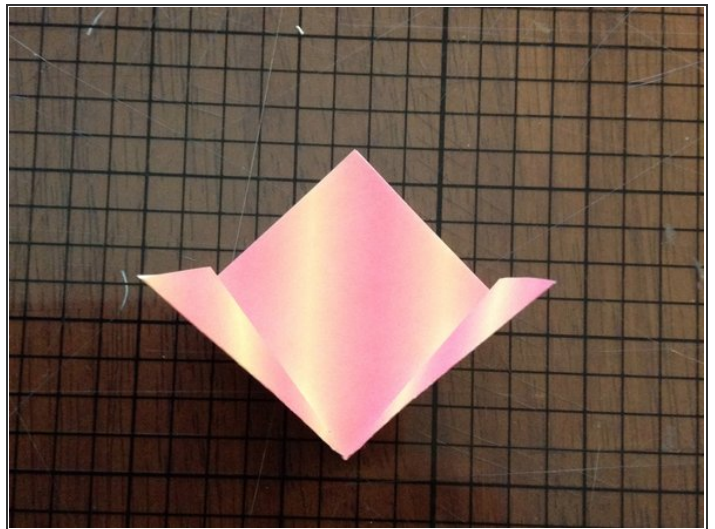

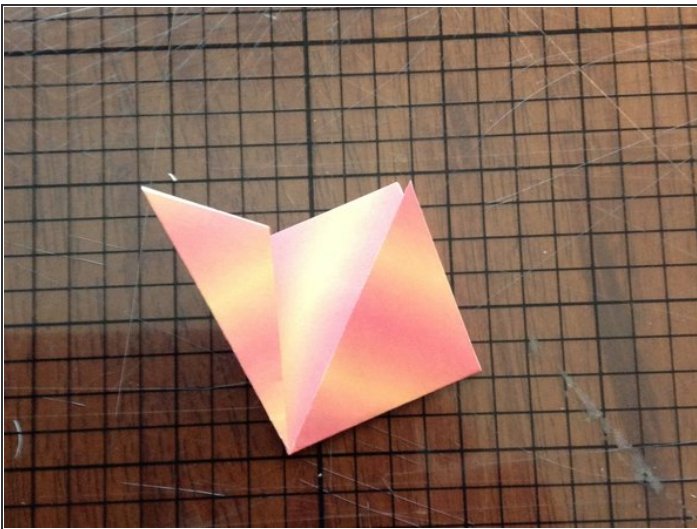

- You will need 5 pieces of paper.
- Start with color side down.
- Fold in half on the diagonal.

Step 3

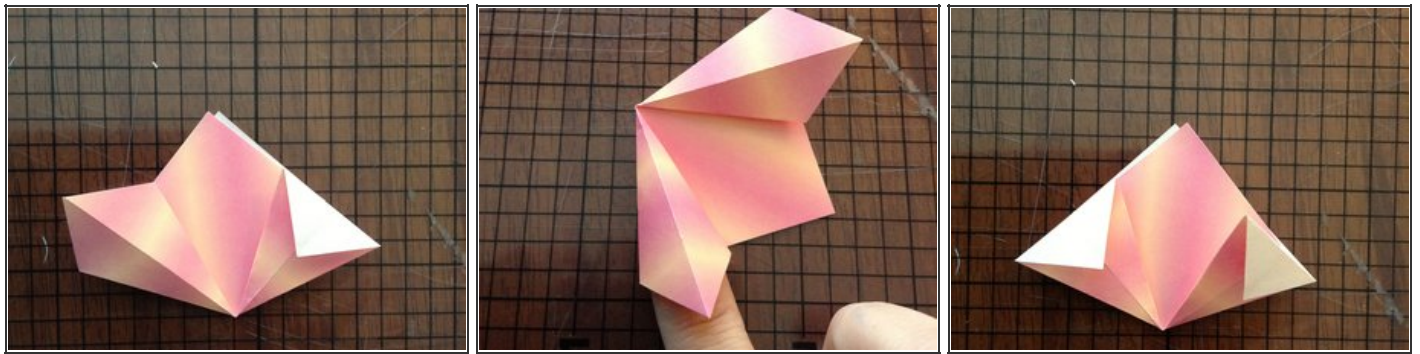

- Fold side points to the top.
- Repeat on other side.

Step 4

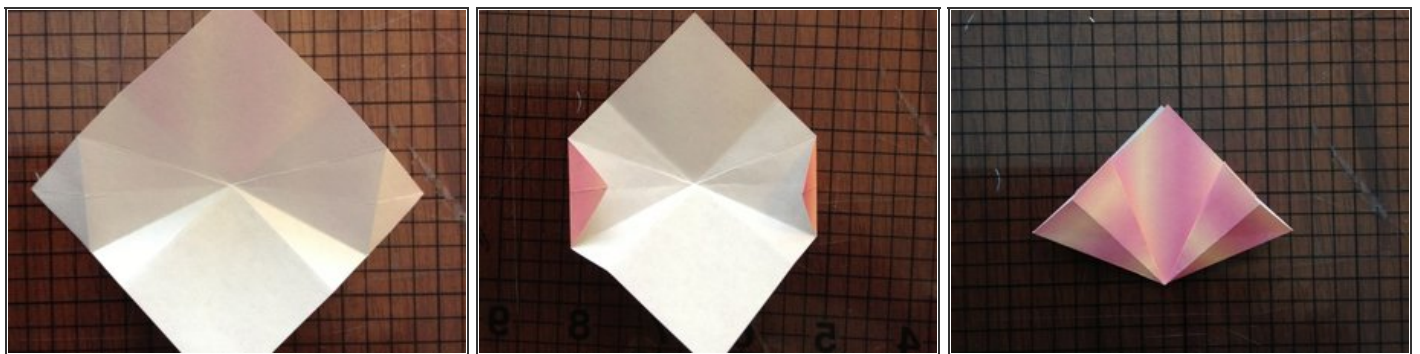

- Fold back along the crease. Long side of triangle will fold back along the outside crease.
- Repeat on both sides.

Step 5

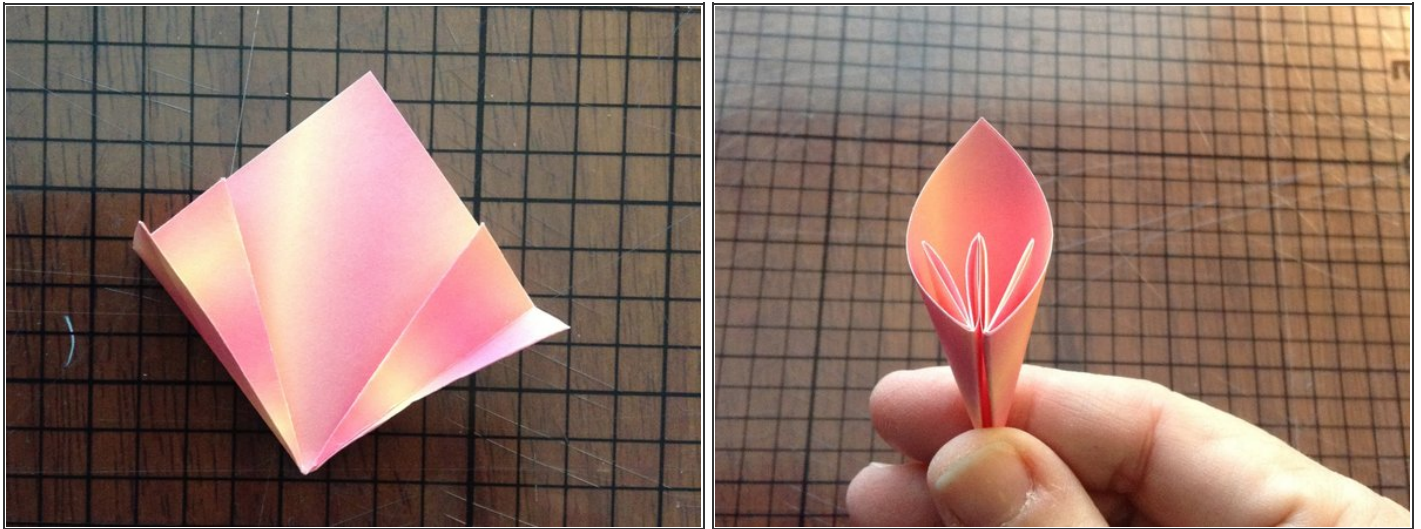

- Unfold the last fold.
- You may need to use your finger to help with the "squash" fold. (Picture #2)
- Repeat on both sides.
- Fold back the point. You will want to fold down so it's even with the paper. (Picture #3)

Step 6

- Open up the unit.
- Fold in the 2 points on the left and right.
- Refold the unit.

Step 7

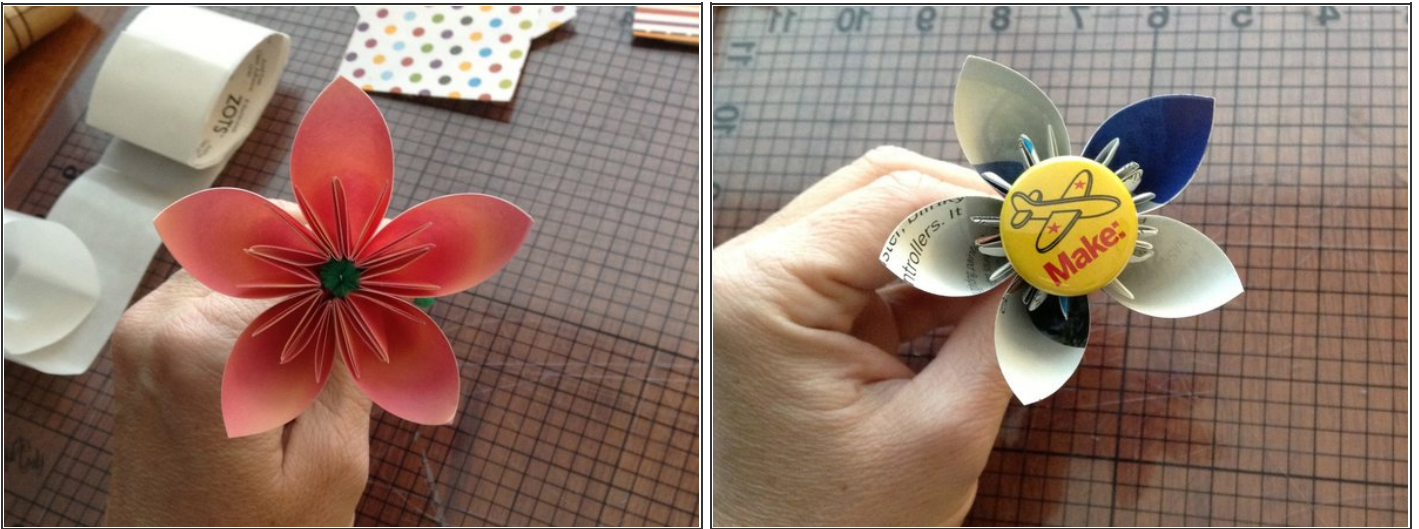

- Fold along the crease.
- You will need a glue gun. I've used sticky dots, but they don't hold over time.
- Put glue on the outside flap, and roll them together. (Picture #2)

Step 8

- Make a total of 5.
- Glue together as shown.
- If you want to add a stem, a pipe cleaner works well. Stick it in after the 3rd petal.

Step 9

- There you have it. A beautiful flower.
- Remember the pictures at the beginning of this guide? The possibilities are endless.
- Have fun!
